PROFESSIONAL SUMMARY

Senior Full Stack Engineer with over 10 years of experience designing, building, and scaling enterprise web applications across fintech, healthcare, education, and SaaS domains. Proven track record of leading engineering teams, architecting cloud-native systems, modernizing legacy applications, and delivering high-quality software in Agile environments.

Experienced in React, TypeScript, Node.js, Laravel, AWS, Docker, CI/CD, and microservice architecture. Comfortable leading technical discussions, mentoring engineers, collaborating with cross-functional stakeholders, and driving projects from concept through production.

TECHNICAL SKILLS

Languages: JavaScript · TypeScript · PHP · Python · Ruby · SQL

Frontend: React · Vue.js · Angular · HTML5 · CSS3 · Material UI · Bootstrap

Backend: Node.js · Express · Laravel · Django · Ruby on Rails · Flask

Cloud & DevOps: AWS · Docker · Circle CI · GitHub Actions · CI/CD · Git

Databases: PostgreSQL · MySQL · MongoDB · Firebase

Testing: Jest · Cypress · RSpec · Jasmine · Karma · Mocha

Methodologies: Agile · Scrum · System Design · Code Review · Technical Leadership · Microservices

AI & ML Development: OpenAI · LLMs · RAG · LangChain · AI Agents · Vector Databases · TensorFlow · Cursor

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Self-Employed

11.2024 – Present

- Designed scalable software architectures tailored to client business requirements.
- Led technical planning from requirements gathering through production deployment.
- Modernized legacy applications by extracting reusable microservices, improving maintainability and scalability.
- Delivered custom software solutions while maintaining close communication with stakeholders throughout the project lifecycle.

Senior Full Stack Developer | TSS, Inc.

5.2023 – 10.2024

- Led architecture and development of underwriting systems and customer-facing portals.
- Built scalable frontend and backend features using modern JavaScript frameworks.
- Increased software reliability by maintaining over 80% automated test coverage with Jest and Cypress.
- Conducted code reviews and architectural design sessions to improve engineering quality.
- Standardized development workflows and deployment processes using Git and CI/CD practices.

Senior Full Stack Developer | Lendistry

10.2020 – 3.2023

- Delivered new product features while collaborating closely with product managers and business stakeholders.
- Modernized more than 30 legacy application pages, improving responsiveness and mobile usability.
- Designed Docker-based development environments to accelerate onboarding and ensure production consistency.
- Built automated CI/CD pipelines with Circle CI and AWS, improving deployment reliability and operational efficiency.
- Refactored shared infrastructure to improve maintainability across multiple engineering teams.

Senior Full Stack Developer | SanX Information System Co., Ltd

11.2018 – 6.2020

- Served as Technical Lead for multiple enterprise platforms, including tuition management and payment gateway systems.
- Directed software architecture and feature implementation across multiple concurrent projects.
- Mentored junior developers through code reviews, technical guidance, and pair programming.
- Improved application performance through browser profiling and frontend optimization.
- Managed project scope, engineering timelines, and technical planning while coordinating with stakeholders.

Web Developer | DataPro Co., Ltd

10.2017 – 9.2018

- Gathered business requirements and translated them into scalable web applications.

- Modernized legacy PHP systems by migrating them to an MVC architecture.
- Developed responsive websites using WordPress, HTML5, CSS3, and JavaScript.
- Improved browser compatibility and application performance across multiple platforms.
- Produced technical documentation and testing artifacts to support long-term maintenance.

SELECTED PROJECT HIGHLIGHTS

Financial Platform

- Designed underwriting workflows and customer portal architecture.
- Developed secure full-stack features for financial services applications.
- Implemented comprehensive automated testing using Jest and Cypress.

Healthcare Scheduling Platform

- Modernized legacy frontend architecture.
- Improved mobile responsiveness across dozens of application pages.
- Built containerized development environments using Docker.

Education Management System

- Led full-stack development from architecture through deployment.
- Developed secure payment gateway integrations.
- Optimized application performance and maintainability.

LEADERSHIP

- Led distributed engineering teams across multiple countries and time zones.
- Mentored junior developers and established engineering best practices.
- Facilitated architecture reviews and technical design discussions.
- Collaborated directly with product owners, designers, QA engineers, and executive stakeholders.

EDUCATION

Tokushima Anabuki College - Department of Information Systems

2014 – 2017

ADDITIONAL INFORMATION

Languages: Japanese (Native) · English (Professional Working Proficiency)

Work Style: Remote · Hybrid · On-site

Work Authorization: Eligible to work in Japan
